Alexander F. Dalhog Jr.

Director of Warehouse & Logistics | Head of HR, AI & Automations | People Operations Leader

alex.dalhog@gmail.com | (+63) 998 490 9379 | Davao City, Philippines | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI & automation builder and people-operations leader with 8+ years across talent acquisition, organizational development, and remote team management, now focused on building production automation systems. Currently Director of Warehouse & Logistics and Head of HR, AI & Automations for Marie Originals, a multi-channel US retailer (DTC and B2B/EDI), where I automate order-to-fulfillment, invoicing, inventory, and CRM workflows across Zoho One and ShipStation using Deluge, webhooks, and REST APIs. Previously led the employee journey for 70+ virtual assistants at Workspaceco Outsourcing, designing and deploying production systems with Claude AI, n8n, and Python, including a 6-agent training pipeline and real-time compliance monitoring. I combine deep operations expertise with hands-on AI engineering to turn manual, error-prone processes into reliable, self-running systems.

PROFESSIONAL EXPERIENCE

Director of Warehouse & Logistics (Sep 2026) · Head of HR, AI & Automations

Feb 2026 – Present

Marie Originals · Multi-Channel Retail, DTC + B2B/EDI · US (Remote)

- Architected the **real-time order-to-fulfillment backbone** linking Zoho Inventory to ShipStation across Shopify, Amazon FBA, Walmart Marketplace and WFS, and **18 EDI wholesale channels**, with a multi-step Deluge push that auto-confirms orders, detects duplicates, bypasses Amazon, and writes IDs back within seconds of order creation
- Built and operate a real-time Zoho Flow running **700 to 800 times daily** that auto-confirms and executes marketplace and web sales orders, after diagnosing and patching a race condition between two automations that had stranded orders in Draft with uncommitted inventory
- Lead **warehouse and logistics** as Director (since Sep 2026): rolled out ShipStation Scan-to-Verify with validated barcodes for **128 products** (caught that 30% of the source UPC data was truncated GTIN-14 codes), traced a KeHE EDI ship-to mapping error that was routing orders to the wrong distribution center, and keep **55 Zoho Flow automations** at a 0.78% failure rate
- Run **HR for the remote team** on Zoho One: hiring and AI-screened recruitment, contracts through Zoho Sign, onboarding, leave policy in Zoho People, offboarding and access control in Zoho

Directory, plus a company-wide email signature system for 34 staff

- Diagnosed and fixed a **single root-cause bug** that sent blank and "undefined" shipping states to ShipStation across every order source, with a defensive four-line Deluge change verified live
- Built scheduled synchronization that imports shipped marketplace orders into Zoho, writes **tracking numbers** back to orders, and creates packages and shipment records for EDI fulfillment, closing a months-long gap in lost tracking data
- Resolved a multi-package **Walmart tracking-loss bug** (a one-line overwrite in a dormant scheduled function), restoring the full tracking set for **414 orders across 487 shipments** with zero errors
- Drove the **EDI / ConnectPointz wholesale operation**: deployed 12 ShipStation per-channel automation rules, enabled per-product carton auto-split, backfilled a 348-SKU catalog with weights and dimensions, and authored the canonical per-channel packing spec and item-master schema covering carton math and DSCSA lot tracking
- Eliminated manual **EDI invoicing** with a scheduled Deluge job that auto-creates draft invoices for confirmed wholesale orders, using a double-gate classifier (all-digit order number plus salesperson confirmation) to avoid touching co-mingled marketplace orders
- Built **customer-facing invoice automation** (auto-itemizes kit and composite components into line descriptions, salesperson notifications, a branded responsive invoice email) and a gap-safe price-list enrichment that re-applies negotiated per-unit rates and alerts on any missing price instead of shipping a wrong one
- Delivered a **seven-pain-point operations bundle** of scheduled jobs: daily USPS SCAN-form generation and manifest transmission (80 to 130 packages per day), rolling delivery-status sync, a data-driven low-stock digest with reorder levels, an EDI open-orders report, and a same-day duplicate-shipment guard with audit alerts
- Built a **CRM healthcare-provider sample-vetting engine** across five iterations that auto-screens every lead for duplicates and fraud, cutting the operator's daily triage queue **21 percent** and flagging 179 hard duplicates; separately reconciled roughly 1,000 orders against ShipStation to recover **100+ stranded sample-kit orders** and rebuilt the dispatch flow causing blank shipping addresses
- Built an **end-to-end AI recruitment pipeline** that scores every applicant against a role-specific 100-point rubric via the **Claude API** and auto-tiers and routes them, delivered across Google Apps Script, a native Zoho Recruit function, and a Zoho Flow plus Notion orchestration at roughly $0.014 per candidate, backed by a careers site, a Notion ATS, and a Zoho One new-hire onboarding system
- Performed deep **Zoho One platform work**: Sprints status-mirror and auto-link automations guarded against update loops, a full Zoho Flow estate audit into a canonical architecture map, reverse-engineering the undocumented PO function signature, tracing every ShipStation API-key consumer, and an org-wide notification cleanup

Development & Experience Manager

`Oct 2025 – Apr 2026`

Workspaceco Outsourcing · Australia (Remote)

- Oversee the **end-to-end employee lifecycle for 70+ virtual assistants** across trades, farm, and professional services sectors in Australia
- Built a **6-agent AI training pipeline** (SCOUT → FORGE → CLEAR → QUILL → PIXEL → LENS) using Claude API and FastAPI, reducing training deck production from **15+ hours to under 30 minutes**
- Deployed a **real-time EOD compliance monitoring system** on N8N Cloud that auto-tracks, classifies, and escalates daily submissions from 70+ VAs with zero manual intervention
- Developed **54 training modules** across 3 tracks — CRM onboarding, professional development, and VA live masterclasses — using AI-powered content generation and Google Classroom
- Executed a **data-driven SEO content strategy** producing 15 optimized articles and 12 LinkedIn posts targeting the Australian trades VA market

- Engineered automated **career & wellness check-in system**, **WhatsApp recommendation analyzer**, and **AI executive inbox briefing** — all production-deployed
- Led **L&D strategy and organizational development** with a bi-monthly two-track training rotation aligning team capabilities with business goals

Recruitment Manager
Apr 2024 – Oct 2025

Workspaceco Outsourcing · Australia (Remote)

- Managed **end-to-end talent acquisition**, scaling the VA team to meet growing demand across Australian trades and professional services sectors
- Built **talent pipelines** and developed screening frameworks, improving placement quality and reducing time-to-hire through data-driven recruitment metrics

Director of Talent & Operations
Aug 2023 – May 2024

TopLobster · Digital Marketing Agency

- Directed **cross-functional operations** spanning talent acquisition, project management, finance, and stakeholder management
- Oversaw full **recruitment lifecycle**, payroll (Gusto), invoicing/MRR tracking (QuickBooks), and delivered quarterly professional development programs

People & Culture Coordinator
Aug 2021 – Oct 2023

SellerCandy · Amazon Seller Support

- Managed the **full employee lifecycle** from talent acquisition through onboarding to offboarding for a distributed remote team
- Drove **engagement initiatives**, maintained knowledge management systems, and served as primary HR point of contact

Sr. Human Resources Officer
Jul 2018 – Aug 2021

Awesome OS Philippines · BPO

- Managed **employee relations**, regulatory compliance with Philippine labor law, administrative investigations, and **change management** initiatives

TECHNICAL SKILLS

AI & Automation

Claude AI (Opus/Sonnet), N8N Cloud, Multi-Agent Systems, FastAPI, Python, Playwright, Prompt Engineering, API Integration, Process Automation

People & HR

Talent Acquisition, Employee Lifecycle, L&D Strategy, Performance Management, Organizational Development, Remote Team Management, Retention, eNPS

Tools & Platforms

ClickUp, Asana, Monday.com, Google Workspace, Slack, Notion, HubSpot, Go-HighLevel, ServiceM8, Xero, QuickBooks, Canva, Google Classroom

EDUCATION

University of Mindanao
Bolton Street, Davao City

Projects & Live Demos

Every project below was designed, built, and deployed by me to solve real operational challenges. Click any link to view live demos, video walkthroughs, and interactive architecture diagrams at my portfolio.

AI Agent Training Pipeline

6-Agent Autonomous Content Production System

Multi-agent pipeline (SCOUT → FORGE → CLEAR → QUILL → PIXEL → LENS) that transforms a training topic into a complete, quality-audited Canva presentation deck. Three human-in-the-loop checkpoints, three training modes, and automated quality scoring.

`Python, FastAPI, Claude Opus/Sonnet, OpenRouter API, Canva API, Windows Task Scheduler`

15+ hours reduced to under 30 minutes

🔗 Portfolio 🎬 Video Demo

EOD Compliance Monitoring System

3-Phase N8N Cloud Automation | Claude AI + Google Sheets

3-phase automated compliance system for 70+ VAs. Morning reminders, Gmail scanning with Claude AI classification (On-Time/Late/Missing), overnight catch-up, escalation drafts, and daily summary emails. Runs fully unattended.

`N8N Cloud, Gmail API, Google Sheets API, Claude Sonnet, OpenRouter`

Zero-touch daily compliance for 70+ VAs

🔗 Portfolio 📸 Screenshots

Training & Development Library

54 Modules · CRM + Professional Dev + VA Live Training

AI-generated branded training decks (PPTX), quizzes, and resource compilations across CRM onboarding, professional development, and VA masterclasses. Deployed via Google Classroom with batch automation.

`Claude Code Skills, Google Classroom, Google Apps Script, PPTX Generation, Canva`

54 modules across 3 training tracks

🔗 Portfolio 🎬 Video Demo

SEO Content Strategy

15 Articles · 12 LinkedIn Posts · Australian Trades VA Market

Targeted SEO content strategy for the Australian trades VA market — plumbers, electricians, builders, HVAC, landscapers. AI-assisted production establishing organic market authority.

`Claude, SEO Strategy, Keyword Research, Content Marketing, LinkedIn`

Portfolio | Agent Diagram

VA Career & Wellness Check-in System

Automated 1:1 Analysis · 30+ Sessions Processed

Automated check-in tracking system that processes 1:1 meeting transcripts via Fathom integration, generating structured career development and wellbeing reports per VA.

`Fathom/Pattern Notes, Claude Analysis, Google Sheets, DOCX/PDF Generation`

Portfolio | Workflow Diagram

WhatsApp Recommendation Analyzer

AI-Powered Network Intelligence

Playwright-based scraper that reads WhatsApp group chats, batches messages for Claude analysis, and extracts structured recommendation networks with endorsement tracking.

`Python, Playwright, Claude Opus, Flask, Google Sheets API`

Portfolio

WSC Executive Inbox Briefing

Scheduled AI Email Triage & Daily Briefing

Fully autonomous daily briefing triggered every weekday at 7 AM. Scans Gmail, classifies emails, drafts replies, pulls calendar events, creates Notion pages, and delivers branded HTML executive summary.

`Claude Code, Remote Triggers, Gmail MCP, Google Calendar MCP, Notion MCP`

Portfolio | Video Demo

ReplyIQ - AI Email Reply Agent

Vibe-Coded Full-Stack App | Built with Lovable

Full-stack web application that monitors Gmail, uses knowledge base context to generate tone-matched email replies, with dashboard analytics and configurable settings.

`Lovable (Vibe Coding), React, Supabase, Gmail API, Claude AI`
